

San Ditan®

Panazym Mobile

Skin - Hoof - Claw

- Cleansing
- Deodorisation
- Active care
for strained skin

Animal care

Ingredients (INCI):

Zinc oxide, acacia senegal gum extract, heilmoor clay, methyl salicylate, copper sulfate, propylene glycol, papain, ichthammol, origanum majorana leaf oil, thymol, alcohol, P-chloro-M-cresol, benzalkonium chloride, bentonite

Product characteristics

Animal skin is exposed to multiple environmental influences – this is particularly true for farm animals living under specific husbandry conditions.

A good example are free stalls for cattle which facilitate natural moving around of cattle according to their species-specific needs. Under such conditions, wetting and soiling of floors is unavoidable, hence free stall floors are an ideal culture medium for many pathogens. When germs and pathogens are given opportunity to enter the skin, claw disease is a common sequel, e.g. Mortellaro's disease.

Farmers have excellent knowledge of the multiple strains and stressors affecting skin health of their animals, particularly concerning effects on the animal's locomotory system.

Hence it becomes obvious that professional skin care with the goal of a healthy, sturdy skin which can resist harmful environmental influences is of great importance. SanDitan® Panazym Mobile combines cleaning and deodorising substances with a skin care formula developed according to latest dermatological scientific insights. Due to its microfine particle structure, SanDitan® Panazym Mobile has favourable distribution and also excellent adhesion properties.

SanDitan® Panazym Mobile is soft and pleasant to the skin (no skin irritation or burning) and can therefore be applied several times a day if necessary.

Functions

- Removal of potential nutrient media for dirt bacteria/bacterial pathogens and fungi
- Prevention of dry skin (cracks and fissures)
- Maintenance and promotion of skin and claw/hoof elasticity

Application

Apply a generous amount on the skin and spread it over the intended regions. On claws and hoofs it is advisable to fix it with a bandage.

Notes

Only for external application. Avoid contact with the eyes.

For easier use, warm up briefly to 30 – 40 °C.

In order to achieve a clear separation from our veterinary medicinal products we exclusively market and label all our animal care products - as the present one - under the umbrella brand „San Ditan®“. Accordingly these products are no medicinal products and need not to be entered into the stable treatment diary.

Package size

450 ml can
