

San
Ditan®

Zeolite-Powder

- For sprinkling onto skin lesions

Animal care

Ingredients (INCI)

SanDitan® Zeolite-Powder is a pure natural product. It contains 98.8 % clinoptilolite-zeolite-mineral, pure stone flour.

Product characteristics

A key attribute of zeolite is its micro-porous structure. It possesses numerous pores and ducts with an extremely large surface area. Just 1 gram of zeolite can comprise a surface area of up to 1,000 m². It is thus characterised by its especially high absorption and water binding capacity.

Functions and application

For sprinkling onto skin lesions

- Absorbs liquids (e.g. on seeping parts) immediately
- Extremely useful for all superficial as well as deep skin lesions, e.g. after castrations
- Forms a breathable layer
- Long-term protection against soiling after rapid eschar formation
- Does not burn and is non-irritant (not itching)

Note

Store in a dry place.

Package size

60 g bottle
