

San  
Ditan®

## Enzyme-Ear-Cleanser

Oily ear cleansing and care  
suspension

- Containing enzymes, vitamins and vegetable care oils
- Balanced composition of mild substances

Animal care

## Ingredients (INCI)

Oily formulation containing: caprylic/capric triglycerides, paraffinum liquidum (AND) polyethylene, tocopheryl acetate (vitamin E), retinyl palmitate (vitamin A), aloe barbadensis (aloe vera oil), calendula officinalis (marigold oil), buxus chinensis (jojoba oil), pancreatinum (with protease, amylase, lipase, trypsin, chymotrypsin), papain

## Product characteristics

SanDitan® Enzyme Ear Cleanser is an ear cleansing and care product for dogs and cats. The dermatologically harmonised ingredients complement each other in their effects.

The enzymes chymotrypsin and trypsin (contained in pancreatin) and papain gently remove excess ear wax, dead cells as well as products of inflammation that may be present and thus inhibit the colonisation of pathogenic organisms in the ear.

Aloe vera, jojoba and marigold oil (calendula) protect and provide care for the ear flap and the outer ear canal.

The dermatologically significant vitamins A and E promote the regeneration of rebuilding processes of the epithelium in the region of the ear. Natural resistance is strengthened.

The balanced composition of mild substances allows for a regular application of the product.

## Functions

SanDitan® Enzyme Ear Cleanser is used for the following purposes:

- Regular cleansing and care to maintain health in the ears
- Cleansing in preparation for a medicated ear treatment

## Application

Shake the bottle well prior to use.

After removing the bottle stopper cap, place generous quantities of SanDitan® Enzyme Ear Cleanser into the ear canal. Gently massage the base of the ear from the outside for about 1 minute. Dissolved impurities and excess fluids are removed from the ear canal by the animal itself as it shakes its head. Subsequently the ear flap is cleaned and dried using a cellulose or cotton wool swab.

SanDitan® Enzyme Ear Cleanser should be used regularly once a week in order to care for and keep the ears clean.

In case of inflammations it is advisable to free the ear of contaminants using SanDitan® Enzyme Ear Cleanser prior to administering a medication and thereby the medication can reach the centre of inflammation more effectively.

Owing to the very short length of the bottle's neck, the sensitive auditory canal cannot be injured, even when the animal suddenly reacts defensively.

## Notes

Only for external application. Avoid contact with the eyes.

In rare cases reddening of the ear might occur for a short period.

Do not use in injured tympanic membranes.

30 drops = 1 ml

## Package size

50 ml vial
